WWW.SLL.FI/MADAGASCAR

Manondroala is a conservation project that started in 2012. It is implemented by local Association Mitsinjo together with the

Finnish Association for Nature Conservation, the biggest environmental organization in Finland. Our work includes forest restoration, environmental education, research and eco-tourism.

There are more than 60 endemic tree species grown in the nursery, and over 25 000 seedlings are planted every year. The Project restores annually more than 25 hectares of natural forest and keeps the invasive, alien bushland from taking over in the degraded areas.

PROJECT MANONDROALA WORKS TO RESTORE THE VALUABLE FORESTS AND WATERSHED AROUND ANDASIBE & RAISE ENVIRONMENTAL AWARENESS AMONG LOCAL POPULATION AND VISITORS. THE FINAL GOAL IS TO HELP PRESERVE THE UNIQUE ECOSYSTEMS OF MADAGASCAR.

You can help too – plant a tree!

Take one of the following steps to take part in the forest restoration:

- 1) Go to Mitsinjo office and ask about the project: Association Mitsinjo, Lot 104, A Gare, Andasibe - Madagascar
- 2) Contact Mitsinjo's president, Mr Jean Noël Ndriamiary, tel. 034 39 27100
- 3) Contact Mitsinjo via email: mitsinjo@hotmail.com

You can also support the project with a donation: visit www.mitsinjo.org
